## Weathering, Erosion, or Deposition?

Group Size: Pairs or Teams

#### Materials:

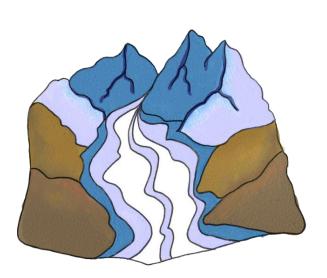

Weathering, Erosion, and Deposition definitions Weathering, Erosion, and Deposition cards Heading Cards and Answer Key

#### Directions

- 1. Review and discuss the meanings of weathering, erosion, and deposition. How are they alike and different?
- 2. Cut apart the 3 Weathering, Erosion, and Deposition heading cards with the arrows and the Answer Key. Turn the Answer Key face down and spread the heading cards out on a table in the middle of the team.
- 3. Cut apart the 16 the example cards. Shuffle the cards and place them face down in a pile.
- 4. One person flips over an example card and reads it aloud. He or she identifies the card as an example of weathering, erosion, or deposition. If everyone agrees, the card is placed face up on the appropriate heading card, right under the arrow. If some team members don't agree, review the meanings of these three terms and think about which term best describes the example on the card.
- 5. The next person flips over another example card and follows the directions in Step 3. Continue taking turns until all example cards are placed below a heading card.
- 6. Turn over the answer key and check your answers.

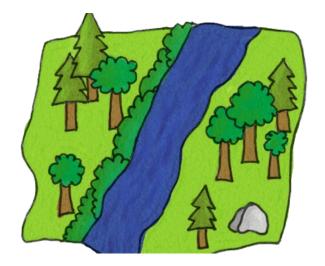

# Weathering

The breaking down or disintegration of substances such as rocks and minerals by physical, chemical, or biological processes

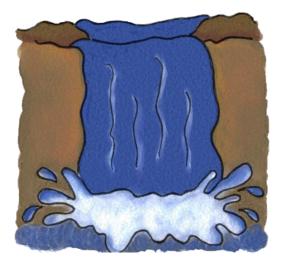

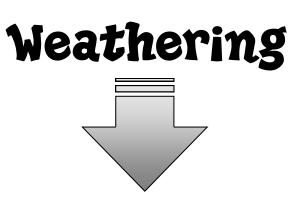

The movement of sediment or soil from one location to another by means of water, ice, or wind

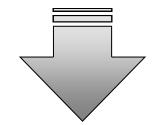

# Deposition

When particles carried by water, ice, or wind are deposited (dropped) in another location

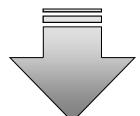

## Erosion

## Deposition

### Answer Key

Weathering 1, 7, 9, 11, 12, 14

**Erosion** 2, 4, 10, 13, 16

**Deposition** 3, 5, 6, 8, 15

### Weathering, Erosion, or Deposition?

1 Flood water pounding against a canyon wall and wearing it down	2 Rain washing away soil from a hillside
3 Layers of sediment forming at the bottom of the ocean	4 A mudslide flowing down a steep hill
5 Glaciers dropping rock and sand to form terminal moraines	6 Waves dropping sand on the beach
7 Caves being formed by acid rain dissolving underground limestone	8 Deltas forming at the mouths of rivers

### Weathering, Erosion, or Deposition?

9 Water getting into cracks, freezing, and breaking the rocks or pavement apart	10 Wind blowing sand from one location to another
11	12
Wind blasting sand	Glaciers scraping
at rock and carving	rocks across the
out arches	earth's surface
<sup>13</sup>	14
Muddy water being	Rocks being made
carried away by a	smooth by tumbling
fast-moving river	across a streambed
<sup>15</sup>	<sup>16</sup>
Ponds filling up with	Flood waters moving
sediment and	soil from one location
becoming marshes	to another
